DSCE ISE ACM STUDENT CHAPTER

Workshop on Artificial Intelligence using Python

2020 Even Semester	ACM Coordinators :Dr.Rajeshwari J
DATE:19-09-20	Mrs.Shalini K B

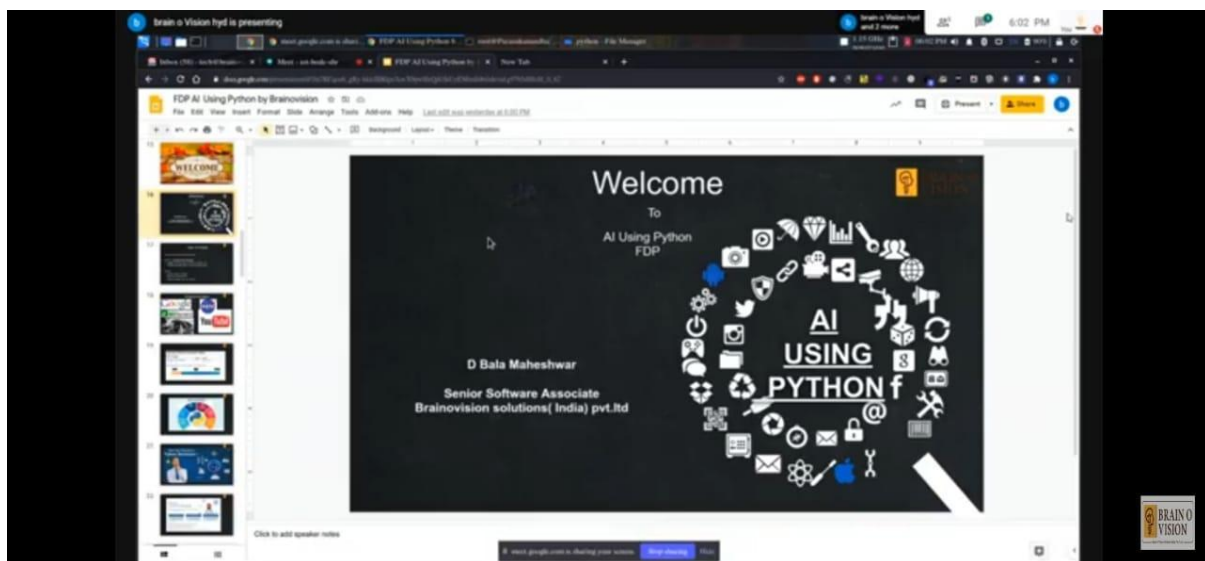

DSCE ISE ACM Student chapter of Department of Information Science and Engineering, Dayananda Sagar college of Engineering hosted a **workshop on Artificial intelligence using python with the collaboration of BRAIN O VISION India Pvt. Ltd...** from 14th to 19th of September. The contest was open to all the ACM chapter members and 5th semester students of Information science department.

The event was inaugurated by BRAIN O VISION India Pvt. Ltd... Team and the faculty coordinators Dr.Rajeshwari J and Prof.Shalini K B . **The speaker Mr. Intisar Mehdi**

by profession, he is a programmer/ Data Scientist / Cloud / Web designer / Corporate Trainer with a multi Linguistic & Ambidextrous skills set: and a “Versatile, Analytic, Programmatic Professional with multicultural exposure amongst diverse segments of the work organization, having significant experience at tactical and strategic level at national and multinational organizations in handling complex resource matters with focus on Technology and implementation.

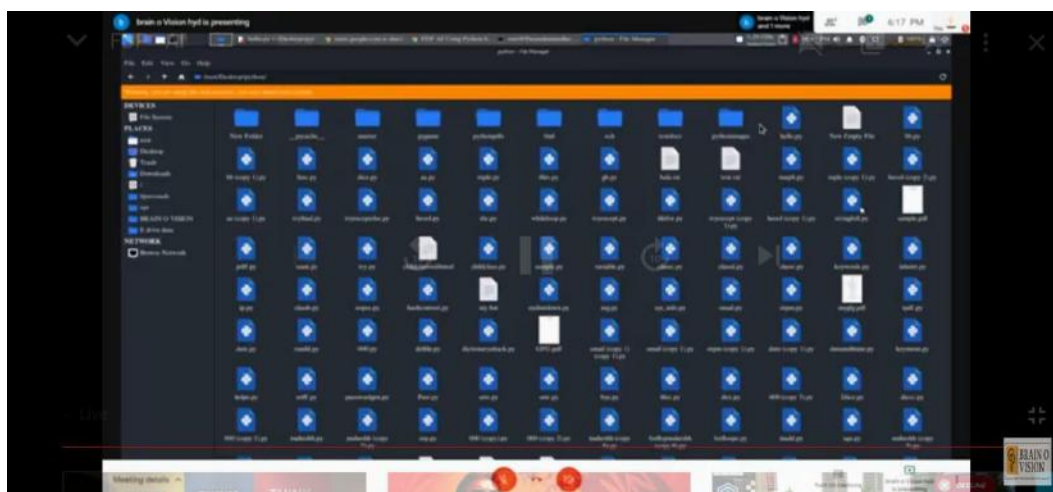

Day 1:

Installing python and using Jupiter notebook. Students learnt basics of python, set, tuples, dictionaries, taking the user input and displaying the contents, for loop, while loop, if condition, sample programs on if, else if, conditional statements with hands on experience.

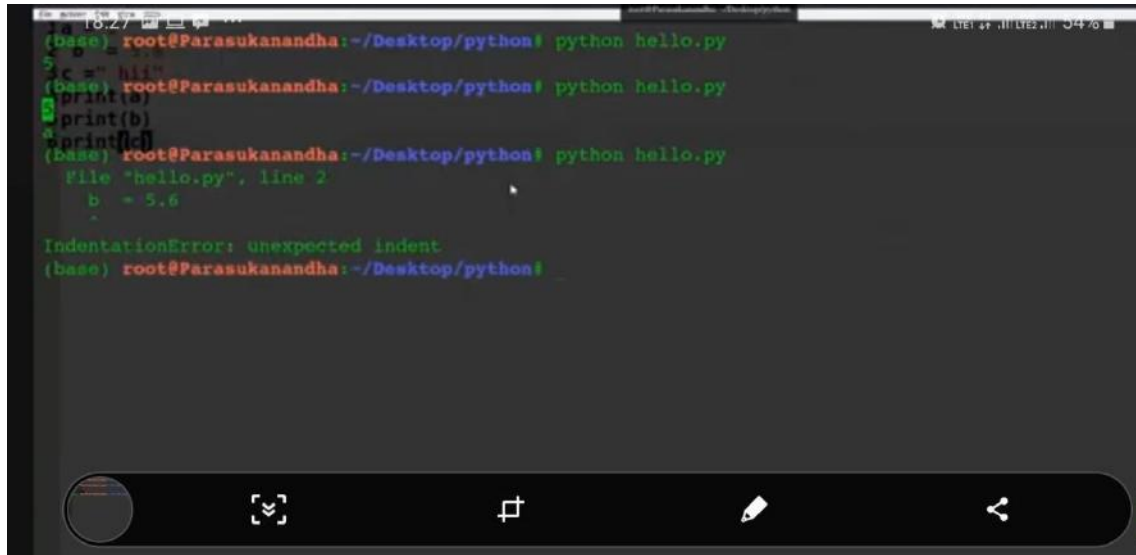

Day 2:

Sample programs on working of lists, operations on lists(union, update, append, difference), working on pandas, viewing inspected data and data visualization

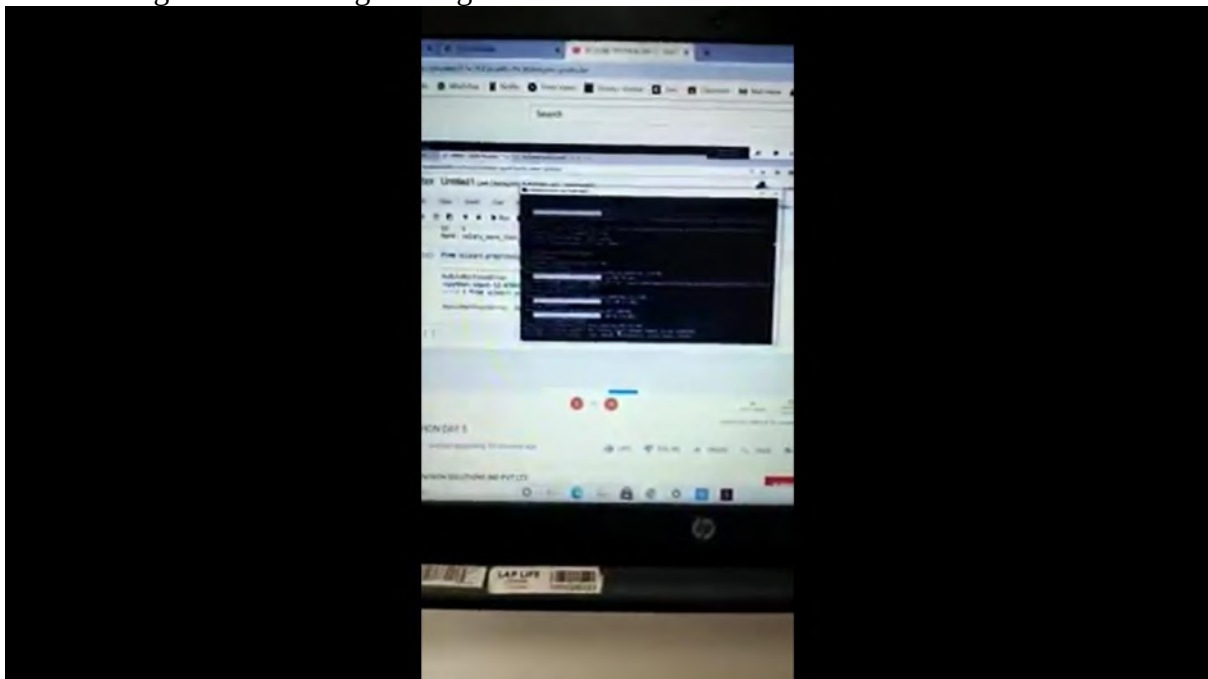

Day 3:

Basics of machine learning, Supervised learning, Unsupervised learning, Reinforcement learning, object, entity, learning algorithm, training and testing model, importing packages, tools used for machine learning, best features available, different levels of python-core python and advance python.

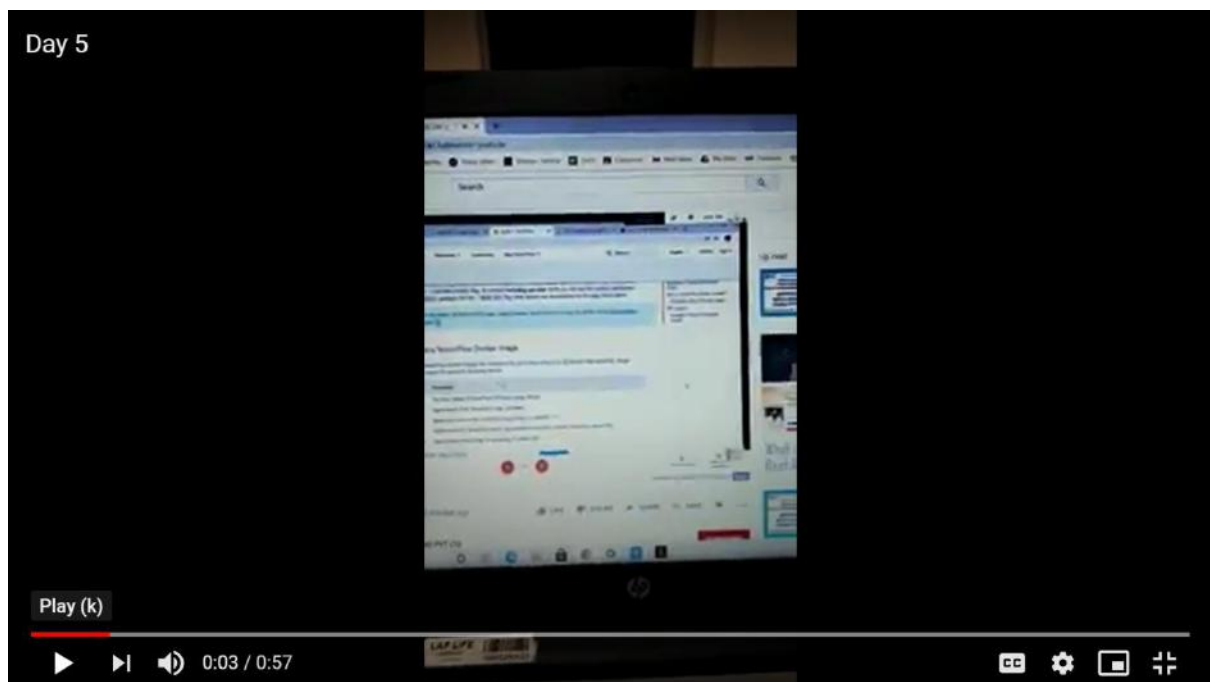

```
(base) root@Parasukanandha:~/Desktop/python# python hello.py
5
c = "hi"
(base) root@Parasukanandha:~/Desktop/python# python hello.py
print(a)
5
print(b)
4
print(c)
(base) root@Parasukanandha:~/Desktop/python# python hello.py
File "hello.py", line 2
  b = 5.6
  ^
IndentationError: unexpected indent
(base) root@Parasukanandha:~/Desktop/python#
```

Day 4: Students were given insight on image classification and machine learning algorithms, k-nearest algorithms and logistic regression.

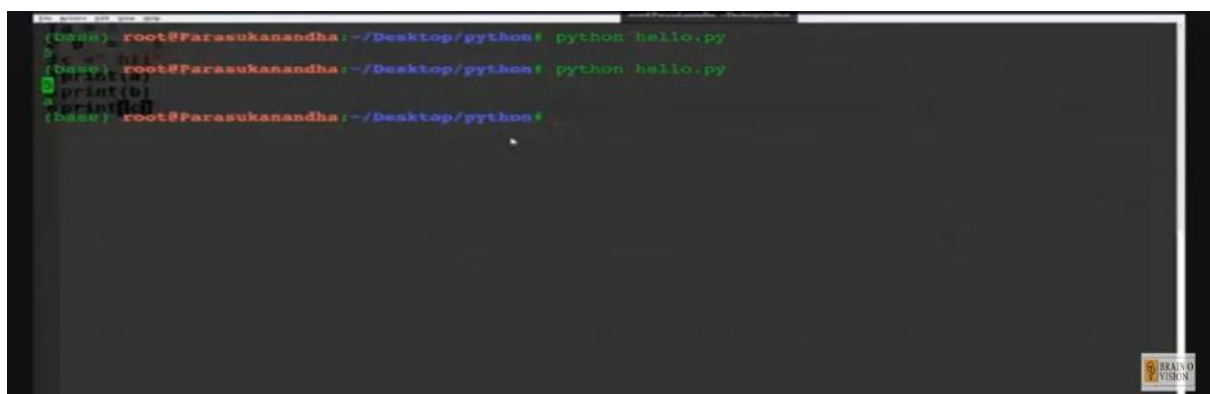

Day 5: Students were given insight on support vector machine, decision tress, random forest, k-means clustering, building and training deep learning models.

Day 6:

Keras, Tensorflow working : A complete guide to using Keras as part of a TensorFlow workflow. If TensorFlow is your primary framework, and you are looking for a simple & high-level model definition interface. Keras layers and models are fully compatible with pure-TensorFlow tensors, and as a result, Keras makes a great model definition add-on for TensorFlow, and can even be used alongside other TensorFlow libraries.

Totally 52 students were participated in the event through online mode. Finally students were gained the knowledge about Artificial intelligence and python with hands on experience.

REPORT ON WEBINAR OF “FROM EDUCATIONAL CHALLENGES TO EDUCATIONAL RESEARCH”

On 12th November 2020, the DSCE ISE ACM Student chapter organized an informative virtual webinar session on From Educational Challenges To Educational Research which was delivered by Dr.Viraj Kumar. The program began with the introduction of Dr.Viraj Kuamr, research professor , Dayananda Sagar University.

Dr.Viraj Kumar came forth and spoke about educational challenges and their solutions.

He spoke it by dividing into 3 parts-

- 1) The story of Aditi
- 2) The story of Prof.Vidhu
- 3) The story of You

The story of Aditi is about the ‘theory of computing’, and the solution about it.

The story of Prof.Vidhu the ‘observations, potential solution’, and a better solution about it was explained.

The story of You , the solution to the challenges and its outcomes was spoken.

1. The Story of Adithi

REC

- **Theory of Computing (Assignment):**
Construct a deterministic finite automaton (DFA) that accepts binary strings where every 1 is followed by two consecutive 0's.

Viraj Kumar

Prof. Vidhu: Observations, Potential Solution?

REC

- Students take lots of notes during demos
 - Some miss key details
- Some students foresee ambiguities and ask clarifying questions
 - Others sometimes miss the point and ignore the discussion
 - Instructor does not clarify further since "this has been discussed"
 - These students get caught in ambiguities and waste time
- Solution? *Visual specification*
 - Video recording of the demo (on-demand repeatability)
 - Sequential (difficult to "skim" like text)
 - Too much detail? (Necessary vs. incidental)

The webinar on Road map to Data Science was conducted on 29th May 2021 from 12:00PM to 1:00PM by DSCE-ISE ACM student chapter. The speaker of the webinar was Preetham.S, Data Science Specialist from GE(General Electric).

The speaker shared his experience as Data Science Specialist in his Company. Given the introduction on what is a Data science, what are the career opportunities in the data science, what is the impact of the data Science. Shared one of the examples that is self-driving car as an application. He also shared that in the near future, applications such as personalized medicine can be developed.

Speaker gave a brief insight on what are the skills required for the Data Science, i.e Programming languages, Data Analysis, Machine Learning, Deep learning and deployment tools. He also given which type of deployment tools to be used in the particular applications. He has specified that the AWS certification is also required for the Data science. Speaker practically shown how to use the Kaggle data set. He also given knowledge on how to participate in competition in Data Science.

The screenshot shows a Google Meet interface with a presentation slide. The slide is titled "Other Resources" and "Dataset". Under "Other Resources", there is a list of links: Krish Naik Youtube Channel, Sentdex Youtube Channel, and Jovian.ml (Website, Youtube). Under "Dataset", there is a video thumbnail showing two people and the text "Me AI". The video thumbnail also contains a list of numbers: 1999 - Nineteen Ninety nine, 1888 - Eighteen Eighty Eight, 1777 - Seventeen Seventy Seven, and 1111 - 1111. The Meet interface shows a list of participants on the right, including Dr RAJESHWARI J (You), 1DS18IS087-Yashaswini, 1DS19IS012- Akhila H, 1DS19IS015_ ANANYA M, 1DS19IS026- Avanthi An..., and 1DS19IS031- Bhoomika RS. The bottom of the screen shows a Windows taskbar with a search bar and various application icons.

Speaker highlighted a road map on which are the resources to be referred for Data Science. . He shared what are roles of data Engineer, Data Scientist, ML engineer and Data Analyst in the company. He has given very good information on the links to internship. What are the prerequisites required for the internship enrolment? He also given the insight on the summer school and given the brief information on how to register.

The screenshot shows a Google Meet interface with a presentation slide titled "Internship". The slide is divided into two columns: "Academia" and "Industry". Under "Academia", there is a list of links: Indian Academy of Sciences - SRFP, IISc - Narendra Summer Internship, IITB - Eklavya Summer Internship(Research Internship), IITM - SEF, RBCDSAI (IITM) - Link1, Link2, NITK - SIP, Summer School, IISc - Link, and IITB - Link. Under "Industry", there is a list of links: Google - STEP, Amazon - SWE Intern (Website), Apple ML and AI career page, Google AI Residency Program, and Facebook AI Residency Program. The Meet interface shows a list of participants on the right, including Dr RAJESHWARI J (You), 1DS18IS087-Yashaswini, 1DS19IS012- Akhila H, 1DS19IS015_ ANANYA M, 1DS19IS026- Avanthi An..., and 1DS19IS031- Bhoomika RS. The bottom of the screen shows a Windows taskbar with a search bar and various application icons.

Speaker practically shown how to enrol in different meetup groups of Data Science, where several meetings will be hosted in these groups through online itself. Example: Microsoft Reactor group which hosts different events on AI, ML, DL .

The webinar was really insightful and all the participants received complementary help on applications for the Data Science.

Webinar
On
Java and its Applications

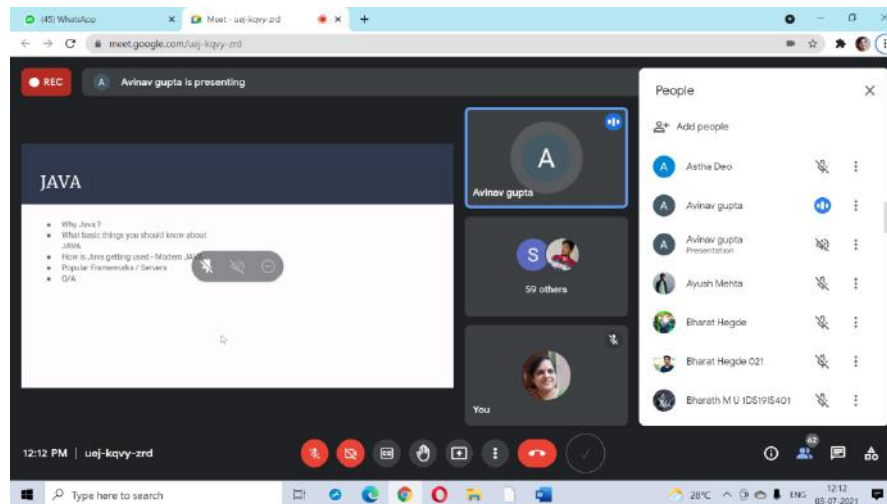

Coordinators:

Dr. Rajeshwari J
Mrs. Shalini K B

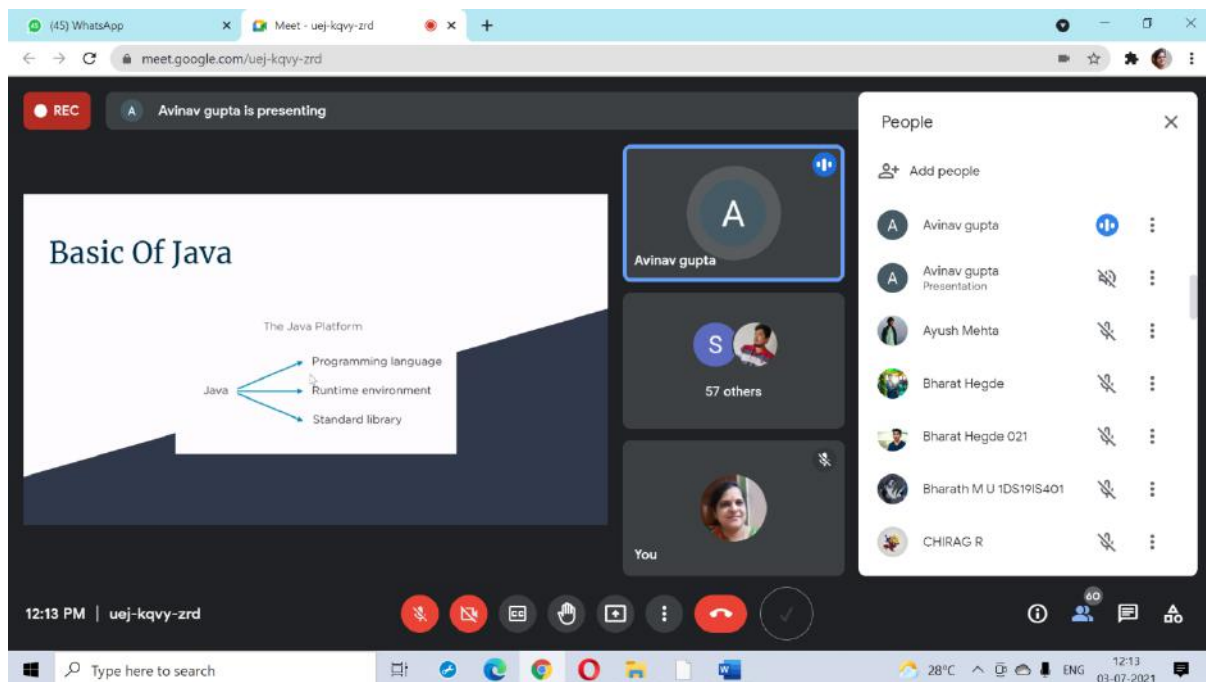

DATE:03-07-2021

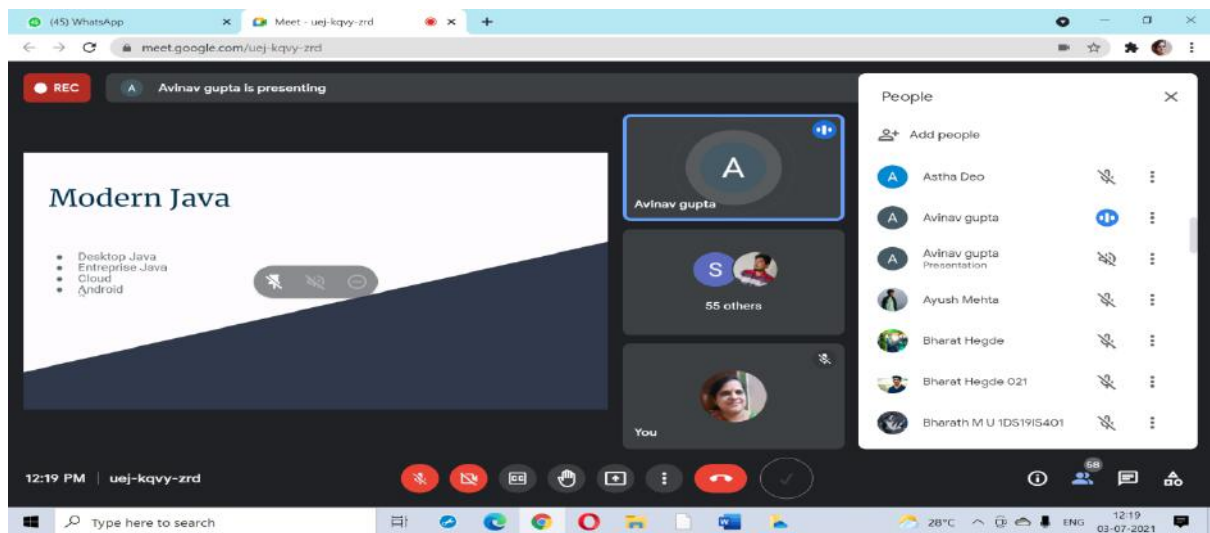

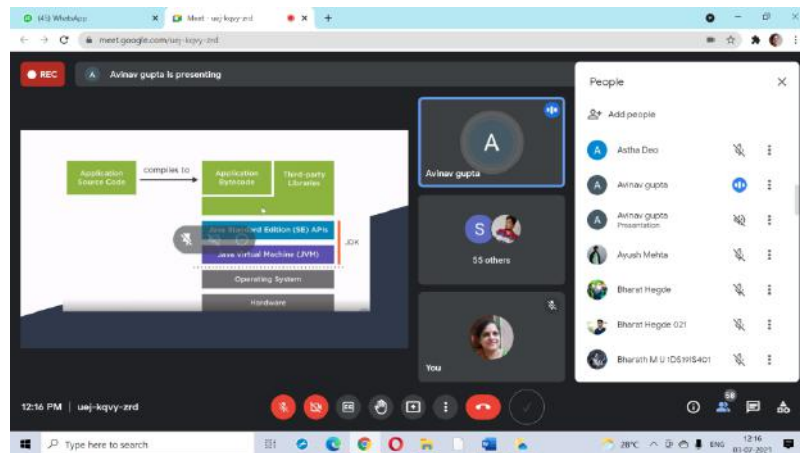

The webinar on Java and its Applications was conducted on 3rd July 2021 from 12:00PM to 1:00PM for the students of 6th Sem ISE. The speaker of the webinar was Avinav Gupta, Graduate Software Developer from Blueoptima company.

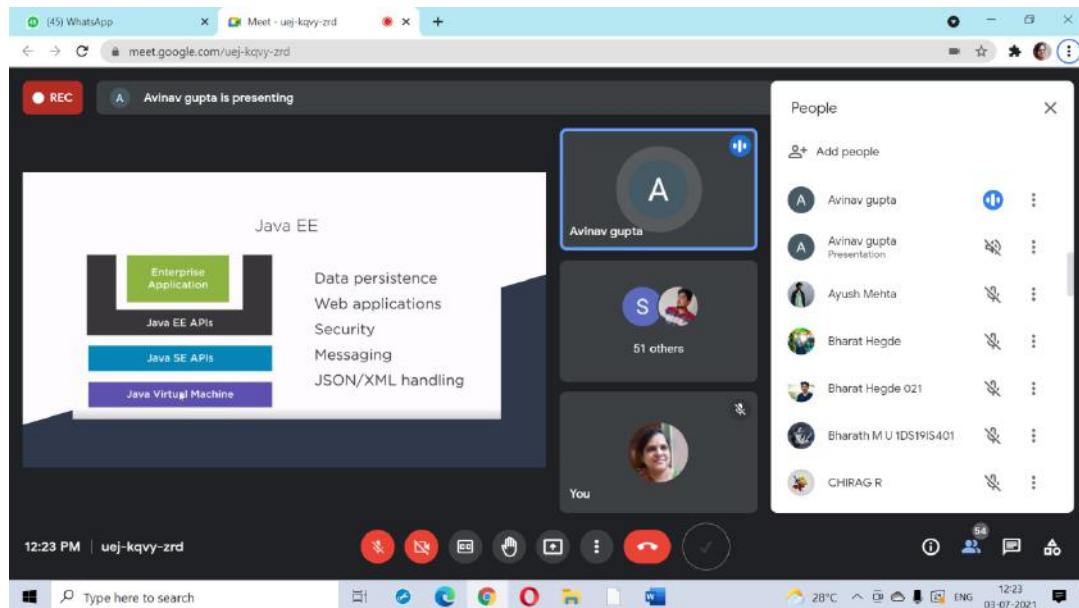

The speaker shared his experience on why Java is necessary. Given the introduction on what is a Java, what are the career opportunities in the Java, what is the impact of the Java.

Speaker gave a brief insight on how Java is environment independent and Operating System independent. Explain how Java file is executed. Explained the third party libraries. Java is defined by a specification and consists of a programming language, a compiler, core libraries and a runtime (Java virtual machine) The Java runtime allows software developers to write program code in other languages than the Java programming language which still runs on the Java virtual machine. The Java platform is usually associated with the Java virtual machine and the Java core libraries

Explained how java is integrated with the Cloud. Java help in creating the microservices. Lot of frameworks are compatible with Java. Andriod java is a subset of Java 7 and 8. Its architecture is same. Explained how importance is scala language

Speaker gave a brief insight on Why do we need Java EE and made students to understand how importance is scalability. We will be using our own frameworks for writing the code. Speaker shared on building tools also. Later there was question and answer session. Speaker also specified which are the materials to refer before attending the interview. Students were satisfied with session.
